Our Innovation. Your Imagination.™

KING COLORCORE®

King ColorCore® is a popular, versatile, environmentally stabilized sheet with contrasting colors and ideal for engraving. Its thin cap layers and bright primary colors make it ideal for signage, marine, playground and recreational applications. King Colorcore is made with high-impact-resistant polymer to handle more abuse than conventional sign materials.

Standard Colors

KING STARBOARD®

King StarBoard® is the original marine-grade high-density polyethylene sheet and the industry standard. It is the product of a proprietary process called K-Stran®, the most advanced manufacturing process for superior flatness and consistency. King StarBoard is environmentally stabilized to withstand the harshest marine conditions. It will not warp, rot, or delaminate when exposed to humidity or water. King StarBoard is easy to fabricate with standard woodworking tools and requires little or no finishing.

Standard Colors

KING STARBOARD® XL

King StarBoard® XL is 100% virgin polymer, marine-grade cellular material with an excellent surface finish that looks good enough to use in high-visibility applications where structural strength and a finished edge are not important. King StarBoard XL sheets are up to 30% lighter in weight than King StarBoard® and are made with the same textured surface and colors for a perfect match.

Standard Colors

KING STARBOARD® ST

King StarBoard® ST is a special, high-density polyethylene sheet that provides a super tough surface for many applications. This unique and advanced polymer makes the material 25% stronger than the original King StarBoard®. King StarBoard ST's high scratch-resistance makes it an excellent construction material.

Standard Colors

KING STARBOARD® AS

King StarBoard® AS is a sure-grip, marine-grade, decking material designed specifically for high-traffic areas. This unique product features a special high-friction surface polymer in a diamond or dot pattern to prevent slipping and promote drainage.

Standard Colors

KING STARLITE® XL

King StarLite® XL is an economical cellular (closed cell) utility sheet made from select high-grade King StarBoard® recycled high-density polyethylene. It is ideal for boat parts, as an upholstery substrate and in other behind-the-scenes applications where edges aren't visible. King StarLite XL is up to 35% lighter in weight than King StarBoard and it offers the same quality textured surface on both sides.

Standard Colors
